KALANCHOE BLOSSFELDIANA

Kalanchoe blossfeldiana is an easy to grow and versatile succulent crop. Kalanchoes are used to add color to interior spaces, outdoor areas and in multi-varietal containers. Finished plants possess long lasting blooms in almost every color. Kalanchoe cuttings are available in rooted, unrooted and prefinished trays.

KALANCHOE BLOSFELDIANA

Rooted & Unrooted Cuttings

Available as a 73 cell tray, pinched 38 cell tray, and unrooted cuttings. Please allow a 6 week lead time on all rooted cuttings.

KALANCHOE BLOSFELDIANA

Pre Finished Trays

Available in 38 or 51 cell trays, these kalanchoes are shipped with flower buds initiated. Available colors are red, pink, yellow, orange, purple, and white. Plants will open first blooms approximately 4 weeks from ship date.

Sol Shine[™]

Landscape Kalanchoe

Sol Shine Landscape Kalanchoes are a new product offered by J&L Plants, Inc. for the 2020 season. Sol Shine Kalanchoes have brightly colored, long lasting blooms available in a wide range of colors. Sol Shine Kalanchoes are well adapted to warm climates and are ideal for adding color to landscapes, flowerbeds, and potted arrangements. Sol Shine Kalanchoes also make excellent border plants along walks and in raised beds. Glossy green leaves turn red in full sun.

Sol Shine Kalanchoes thrive in sunny and partly sunny situations, but they can also be planted in shady spots that receive filtered light or part-day sun. They should be planted in well drained soil and be fertilized once per season. Water needs are low to moderate and the plants should be watered once the soil surface has started to dry. Avoid overwatering and soggy roots/soil.

Sol Shine Kalanchoes are an easy care plant and a great way to add long lasting color to landscapes. Available in 6 packs with a handle, 4" pots, and gallon pots.

HEMP YOUNG PLANTS

Rooted Cuttings & Seedlings

J&L Plants has entered into licensing agreements with Centennial Seeds and Grow Hemp Colorado to ensure farmers have access to Farm Bill compliant genetics that come straight from the breeder. Our relationships with the industry's most reputable breeders, allows our farmers to rest assured that the genetics they plant are true and reliable.

VC STAR

Rooted Cuttings & Seedlings

VC Star is AOSCA Certified in 4 states and has been added to the Texas Department of Agriculture's List of Approved Varieties. VC Star is 100% stable and has consistently tested below .3% total-THC for multiple years in multiple states. VC Star produces large plants with good branching and an open canopy. The variety is multipurpose and can be grown for CBD, fiber and grain. Seedlings are unsexed and will produce approximately 60% female plants.

BaOx

Rooted Cuttings

BaOx is a high-CBD variety developed by Centennial Seeds that combines an inbred Hindu Kush line and the Otto male used to create the Otto II hybrid seed. BaOx is fast growing, vigorous, uniform in height and yields high levels of biomass per acre. The variety has been grown with compliant levels of THC for multiple years and breeds true for the high-CBD chemotype.

OTTO II

Rooted Cuttings

Otto II is a hybrid high-CBD hemp variety developed in Colorado by hemp breeder Ben Holmes, owner of Centennial Seeds. Otto II is stable and breeds true for high ratio CBD expression. Otto II is excellent for use in botanical extraction applications. The plants are vigorous and can be quite large. Grown in sunlight along Colorado's Front Range, flowers reach peak resin content in late-September.

WHITE CBG

Rooted Cuttings

CBG is an exciting new cannabinoid and biomass is in high demand by processors and consumers. CBG genetics are type 4 chemotypes and will produce low levels of THC. Growers can expect 12-18% CBG at harvest with less than .20% total THC. Order early to ensure availability.

SUCCULENTS

Assorted Varieties

Assorted succulent varieties are available year round from J and L Plants. Succulents are available as rooted and unrooted cuttings. Varieties include: Aeonium, Aloe Vera, Baby Jade, Crassula, Echeveria, Graptopetalum, Graptosedum, Kalanchoe, Pachyphytum, Portulaca and Sedum.

Rooted cuttings are available in 38, 51 and 73 cell trays. Minimum of 3 trays per order.
