Tweed	Pastels Mix	Decorative	11	3
Weaver	Purple/White	Decorative	11	3

# Sol Shine

Landscape Kalanchoe <sup>TM</sup>

Sol Shine Landscape Kalanchoes have brightly colored, long lasting blooms available in a wide range of colors. They're well-adapted to warm climates and are ideal for adding color to landscapes, flowerbeds, and potted arrangements. They make excellent border plants along walks and in raised beds. Glossy green leaves turn red in full sun.

Sol Shine Kalanchoes thrive in partly sunny environments but they can also be planted in shady spots that receive filtered light or part-day sun. They should be planted in well drained soil and fertilized once per season. Water needs are low to moderate. Plants should be watered once the soil surface has started to dry. Avoid overwatering and soggy roots/soil. Cut back spent blooms for a second flush.
